

# GDeck™

## SUSTAINABLE COMPOSITE SOLUTIONS DELIVERED

AIT Composites GDeck™ is a pultruded FRP decking product that eliminates the need for a concrete deck on a buried arch structure. We utilize advanced composite materials to create a durable, strong, lightweight, corrugated FRP deck. This robust decking efficiently supports heavy loads.

- Can be manufactured to any length, and is easily attached with self-drilling screws
- GDeck™ exceeds competitors standards by utilizing an improved resin system that provides higher durability, UV protection, and better alkali resistance characteristics.

### Benefits

#### 100+ Year Service Life

- AIT Composites FRP GDeck™ is corrosion resistant which aids in designing a structure with a much longer service life than steel or concrete decking.

#### Significant Weight Savings & Exceptional Strength

- GDeck™ mechanical properties are one step ahead of alternative solutions.
